

Depalletisers

Picking up, pushing or lifting a complete layers of products, such as:

- glass and PET bottles;
- cans,
- cartons;
- other containers of different size and shape.

Application:

- beverage and non alcoholic drinks;
- milk industry;
- brewing and winemaking;
- spirit industry;
- food/ fruits and vegetable industry.

Characteristic features:

- an automatic pallet infeed system, enable to load up to three full pallets;
- an automatic infeed layers' blocking system while their moving;
- adjustable discharge height, which enables the machine to depalletise at every height ranging between the minimum and maximum pallet loading level, thanks to which it can be easily fitted to different production lines;
- an easy and simple product change operation by selecting the height of the new product to be depalletised from the control board without having to stop the machine;
- the automatic layerpad removal unit, which can be positioned both on the left and on the right side and also in front of the machine, assuring in this way a high level of flexibility;
- an easy way to infeed full pallets with a fork lift;
- easy method of operating through a control panel.

In optional versions are available:

- automatic pallet infeed;
- empty pallet magazine;
- layerpad removal device with magazine;
- supervision and teleassistance via modem

No	Technical data	Value
1	Mechanical speed per minute [Cycle/min].:	from 1,2 to 3
2	Installed power [kW]:	from 3 to 10
3	Air consumption [NI/min.]:	from 150 to 300
4	Air pressure [Atm]:	from 6 to 7
5	Maximum height of a pallet h.Max/mm.:	1940

We offer complex service.

Designing, constructing, assembling, starting- up and servicing all our Equipments.

We remain at your disposal any time.
