## Packaging machines

### **Packaging with stretch film or wrap around cartons for:**

- cartons;
- cans;
- bottlers;
- diverse containers.

### **Application:**

- beverages and non alcoholic drinks;
- milk industry;
- brewing and winemaking;
- spirit industry;
- food industry;
- chemical and pharmaceutical industry.

### **Types of packaging machines:**

#### **Shrink wrappers:**

Automatic shrink wrappers with overlapping film system with the efficiency of 200 packs per minute, available in different versions and models. They are used for glass and plastic bottles, cans, boxes and other containers. They wrap with film only, tray and/ or film+ tray.

#### **Case packers:**

Wrap around style wrapping ( with or without automatic product inserting unit) with the efficiency up to 80 cartons per minute). They are used for a wide range of diverse products. They operate by wrapping around instead of inserting products. Therefore, they are highly flexible in terms of the type of product or type of wrapping: trays, complete cartons.

### **Combined lines:**

Combined lines consist of wrap around case packers and shrink wrapper with shrinking tunnel. They enable to wrap wrap around cartons and trays with film. They assure the highest efficiency as far as type of packaging is concerned.

### **Special 90° feeding system, which allow to:**

- handle all types of containers, including instable ones;
- smoothly guide products in order to keep the production in constant move;
- decrease machines' dimensions;
- eliminate divider for separating products, which economizes production space and decreases costs.

### **Features:**

- effective system of separating products;
- easy method to change settings for different products;
- control during all stages of production;
- easy and electrical controlling system, including remote assistance.

***We offer complex service.***

***Designing, constructing, assembling, starting- up and servicing all our Equipments.***

**We remain at your disposal any time.**
